

CNN Study App - How to Use

Certified Nephrology Nurse Exam Prep Course

1. Getting Started

Open the app at <https://omllenado-rgb.github.io/cnn-exam-study/> on your phone or computer.

Sign in with your name and a password. New users set a password on first login. Your progress saves automatically, so you can pick up where you left off on any device.

2. The Main Tabs

Quiz - Practice questions. Choose a topic or All, then Start Quiz. Every question has an explanation. Questions shuffle each time.

Lessons - Short study lessons that teach key concepts in plain language, with diagrams. Filter by topic.

Strategies - Test-taking strategies from the Mometrix CNN guide (pacing, guessing, reading questions).

Flashcards - Flip cards to build recall. Mark ones you know.

Trackers - Your progress and study time. This is where you log hours. See section 3.

Add Content - Admin only. Add questions/flashcards or request new content from a PDF.

Admin - Admin only. View all users, reset passwords, export a spreadsheet.

3. Trackers - Your Progress

The Trackers tab shows your study stats at a glance:

Day Streak - consecutive days you studied.

Sessions - number of study sessions.

Cards Known - flashcards you marked as known.

Answered / Correct / Accuracy - your quiz performance.

Today / Total Time / Study Days - time spent in the app.

Accuracy by Topic - how you are doing in each subject.

Time by Section - minutes spent in Quiz, Lessons, Strategies, and Flashcards.

Focus Suggestions - the app tells you your weakest topic and offers a one-tap practice quiz.

Wrong-Answer Review - re-quiz yourself on questions you missed.

4. How to Add Study Hours Manually

This is the most important part. The app tracks time you spend **inside** the app automatically. But if you study **outside** the app - self-study, the renal core course, a review course, or reading - you need to log

those hours yourself.

Step 1: Sign in to the app.

Step 2: Tap the **Trackers** tab.

Step 3: Scroll down to the **Log Study Hours** card (it has a light blue accent bar).

Step 4: Enter the number of hours you studied (you can use decimals, e.g. 1.5 for 1 hour 30 minutes).

Step 5: Choose the category that fits:

Self-study - studying on your own

Renal core - the renal core course

Review course - the certification review course

Flashcards - if you used paper/other flashcards outside the app

Other - anything else

Step 6: Tap **Add**. Your hours are saved to your account and added to your total study time.

The breakdown below the card shows your total manual hours and how they split by category.

5. Why Logging Hours Matters

The certification pathway goal is 80 hours of study (for example, 2 hours a day, 3 days a week, for 14 weeks). Logging your hours - both in-app and manual - lets the study leads see your real progress and make sure you are on track for the February 2027 exam. Your hours are tied to your account by name, so they are accurate.

6. Quick Tips

Log your manual hours the same day you study, so you do not forget.

Use the Focus Suggestions to drill your weakest topic.

Re-quiz your wrong answers weekly to lock in the material.

Use dark mode (moon icon, top right) for comfortable night studying.

If you have a PDF or study material you want turned into questions, email it to your admin.
